

## EMPLOYMENT ANNOUNCEMENT

- TITLE:** General Internship
- COMPANY:** ICx Technologies, Inc.
- LOCATION:** ICx Nomadics  
All Locations
- SALARY:** Commensurate with experience
- MIN. REQ.:** Dependent upon project requirements

ICx Nomadics is always on the lookout for talented student interns in multiple science and engineering fields as well as finance and administration. We are looking for intelligent, flexible and resourceful individuals to fill these positions. The candidate must also demonstrate excellent writing and communications skills, and have the ability to work as part of a team.

We are interested in bright, creative individuals with a positive, can-do attitude. Applicants must be results-oriented and possess good written and oral communication skills. Essential work habits for these positions include adaptability, analysis, commitment to quality, compliance, inquisitiveness, organization and persistence.

### **DUTIES WILL INCLUDE BUT WILL NOT BE LIMITED TO:**

- Engineering interns will support the engineering, production and research staff on multiple projects and procedures specific to the engineering field
- Science interns will support engineers and researchers in the performance of experiments and procedures specific to their field of study
- Perform other duties as assigned.

ICx Technologies, Inc. offers an excellent benefits package, 401K and paid vacation and holidays. Interested candidates should send a resume or CV via e-mail to [careers@icxt.com](mailto:careers@icxt.com) or via fax to: 405.372.9537 with the position title in the "Attention" line.

Please specify scientist or engineer in the subject line.

### **ABOUT ICx**

ICx Technologies sells products designed to thwart terrorists, sniff out improvised weapons and intercept agents of mass destruction. Our sensors detect chemical, biological, radiological, nuclear and explosive (CBRNE) materials. We manufacture security radars, infrared cameras and other products that detect, illuminate or neutralize incoming threats. And we sell systems and software that link, supervise and control security products supplied by ICx and other vendors and partners. We provide solutions where traditional technologies are too expensive, cumbersome or unreliable to do the job.
