

- TITLE:** Product Manager
- COMPANY:** ICx Technologies, Inc.
- LOCATION:** ICx Griffin Analytical
West Lafayette, IN
- SALARY:** Commensurate with experience
- MIN. REQ.:**
- Bachelors or advanced degrees in science or engineering preferred
 - 5+ years applicable experience in product development

ICx Griffin Analytical is a high-tech, high-growth R & D and product development company focused on premium class chemical detection equipment. In ICx's dynamic and entrepreneurial environment, field-portable mass spectrometry technologies are: researched, designed into robust products, manufactured on-site and sold to customers throughout the world.

Technical Product Manager candidates will be responsible for proactively managing and guiding the development of best-in-class fieldable mass spectrometry instrumentation. Candidates will have the opportunity to drive products to market by leveraging ICx Griffin Analytical's functional area expertise.

CRITICAL JOB ELEMENTS:

- Demonstrate the ability to be a product champion
- Work with customers and sales and marketing team to define product requirements
- Develop product development schedules based on customer, technical and business requirements
- Drive project teams to uphold timely and cost-effective completion of projects
- Coordinate the inclusion of engineering and technical expertise into proposals, projects and marketing materials
- Generate regular reports regarding project and budget status and conduct regular management reviews
- Drive the progression of advanced technologies to market-ready products

ABOUT ICx

ICx Technologies is a leader in the development and integration of advanced sensor technologies for homeland security, force protection and commercial applications. Our proprietary sensors detect and identify chemical, biological, radiological, nuclear and explosive threats, and deliver superior awareness and actionable intelligence for wide-area surveillance, intrusion detection and facility security. By leveraging our unparalleled technical expertise, ICx pioneers the integration of these advanced sensors into effective security and commercial solutions.

QUALIFICATIONS:

- Bachelors and advanced degrees in science or engineering preferred
- Five (5) or more years of applicable expertise in product development with direct project experience in developing scientific instrumentation, sensors or precision electronics
- CBRNE experience desired
- At least five (5) years of government program management experience preferred
- Demonstrated ability to effectively manage multiple complex projects required
- Ability to effectively communicate and interact with team members, corporate management and customers
- Ability to champion a product through development and into market launch
- Strong project planning and management skills required
- High energy, proactive orientation
- Comfortable in a dynamic, entrepreneurial atmosphere
- Experience with Microsoft Office applications, in particular Excel and Project
- Current product design skills (mechanical or electrical) advantageous

Note: This job description is not all-inclusive. Employee may perform other related duties as negotiated to meet the ongoing needs of the organization.

ICx Technologies, Inc. offers an excellent benefits package, 401K and paid vacation and holidays. Interested candidates should send a resume in Word or PDF format to: careers@icxt.com or via fax to: 765.496.6489 with the position title in the "Attention" line.
