

CAMELEON™

Version 4

ADVANCED CCTV CONTROL AND DISPLAY SOFTWARE

Cameleon Version 4 is a full-featured solution that allows you to view and control IP and analog video simultaneously through a single interface. Camera control is a snap thanks to drag-and-drop selection of cameras and mouse movement control.

Make the most of the powerful Cameleon scripting language and configurable desktop to customize the system to your needs. Combine equipment from different manufacturers and link external access control and alarm systems to create an integrated security solution that works for you.

FEATURES

Hybrid IP / Analog Video

Custom Windows

Fluid PTZ Control

Device Gadgets

FTP Image Capture
